

# Forrest

Age 10

**Energetic  
Caring  
Happy**

Forrest is a charming, outgoing, and energetic boy, with a bright infectious smile. He loves being outdoors playing with his friends, swimming, and watching cartoons. Like many boys his age, in his free time Forrest enjoys playing video games, building with Legos and watching Marvel Superhero movies.

Forrest shares that he really likes to eat. Some of his favorite foods are chicken wings, French fries, and cereal.

Forrest is caring, active, and excited to find a family to call his own. He desires an adoptive family with a pet, especially a dog. It is important to Forrest that his adoptive family is an active family who enjoys vacations to the beach, the mountains and going to amusement parks, as well as day trips where he can swim, explore, and take new adventures.

The treatment team feels Forrest would manage better in a two-parent home where he is the only youth or the youngest youth. The team also feels that Forrest would benefit from a family that will patiently work with his current team to learn how to best support his needs for the future and address past trauma.
